

Statement

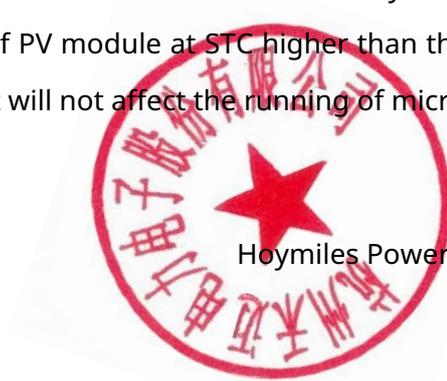

We, Hoymiles Power Electronics Inc., hereby to state that we will guarantee below,
The product it will be under 12 years warranty and can be extended to 25 years with following conditions,

Model	PV module voltage (V)	PV Power (W)
MI-350/HM-350 MI-700/HM-700	< 60	≤ 472.5
HM-800	< 60	≤ 540
MI-1200/HM-1200	< 60	≤ 405
MI-1500/HM-1500	< 60	≤ 506.25
HMS-800LV	< 65	≤ 540
HMS-1000	< 65	≤ 675
HMS -1800	< 65	≤ 607.5
HMS -2000	< 65	≤ 675

If PV voltage under 60V, but PV power over the requirement, the product will under 12 years warranty but can not extend the warranty.

Below are the details,

- * The maximum open circuit voltage rating of the PV module with the temperature between -40°C~ 65°C must be within the input operating voltage range of the Microinverter.
- * If the DC output power of PV module at STC exceed 1.35 times of the output AC power of the Microinverter, will not be able to extend the warranty.
- * If the maximum power current of PV module at STC higher than the maximum input current of the Microinverter, it will not affect the running of microinverter.
